

## 1. DIP Setting.

Before replacing the damaged Text-display, locate the DIP-Switch on it and write the setting down on the DIP-Setting scheme.

- It is important that the new Text-display has the same DIP-Setting as the one it is replacing.

DIP-Setting scheme.

## 2. How to replace digits.

1. Turn off the power for the Scoreboard.

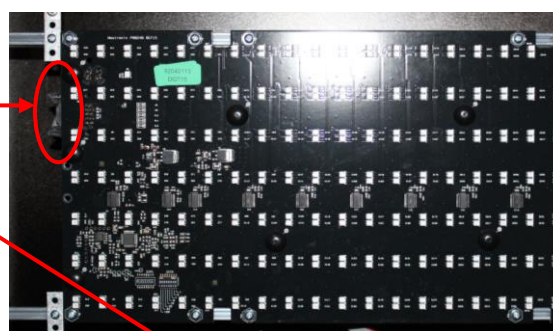

2. Dismount the screws in one of the sides of the Scoreboard, and remove the metal bracket.

3. Remove the Acryl covering the Text-display that must be replaced.

4. Unscrew the screws holding the Text-display in place.

5. Disconnect the Ribbon Cable mounted on the old Text-display.

6. When removing the old Text-display, disconnect the 4 pin rear connector.

7. Before the new Text-display is mounted, make sure the 4 pin rear connector is properly connected.

8. Reconnect the Ribbon Cable.

9. Set the DIP-Switch on the new Text-display, according to the DIP-Setting scheme that was filled in the top.

10. Turn on the power for the Scoreboard, and check that new Text-display is working.

11. Reassemble the Scoreboard.
